

MARKETING YOUR ANDROID APPS

Lesson 2 IAPs + Advertising = Killer Combination!

Intro Lesson 2

- Advertising model. How to select the correct ad network, integrate to your app and configure it.
- IAPs and Subscription Model. Select the correct to your app.
- Key performance indicators. How to select yours and create a dashboard in analytics for this.

MARKETING YOUR ANDROID APPS

Why you should combine both?

- Through analysis of over 10,000 top Android apps, we found that games can earn approximately 117% more revenue by adding ads to apps using IAP.
- The key challenge in testing the hybrid model is to properly segment and target users in order to provide a great experience for both paying and nonpaying users.
- A third of developers surveyed have embraced the hybrid monetization model, which enabled them to monetize more users in a way that optimizes for user experience.

3 characteristics of the hybrid model

The principles of building an effective hybrid monetization strategy

To build a strong hybrid monetization strategy, developers need to:

- Identify the signals required to segment users and predict their purchasing potential.
- Optimize the format, timing, frequency, and placement of each monetization opportunity, whether it be an IAP item or a regular paid ad.
- Build or find the tools to automatically target the right users with the right monetization opportunity in real time.
